PART 1. ABOUT NMAT

The National Medical Admission Test (NMAT) is a standardized test designed to upgrade the selection of applicants seeking admission to Philippine medical schools. It evolved from a widespread concern to screen qualified candidates aspiring for a medical degree. It intends to improve the quality of medical education in the country and envisions to elevate the medical profession to a level of competence through a careful evaluation of student potentials for future medical studies.

Pursuant to the Medical Act of 1959, the Board of Medical Education (BME), under DECS Order No. 52 series 1985 and in consultation with the Association of Philippine Medical Colleges Foundation, Inc. (APMC), required the NMAT as a prerequisite for admission in all medical schools nationwide beginning school year 1986 - 1987.

The Center for Educational Measurement, Inc. (CEM) has been authorized to manage the affairs and activities related to the operation of the NMAT since the first administration of the test in December 1985. With CEM's experience as an educational testing agency, it was commissioned to develop the NMAT, ensure the reliability and validity of the test, and uphold the confidentiality of results and integrity of its administration.

The NMAT is administered twice a year in the Philippines, usually during the months of March and October.

Brief Description of the Test

The NMAT is a two-part test: Part 1 consists of tests of mental ability and Part 2 are tests of academic proficiency. The four subtests that compose Part 1 measure aptitudes that were found to have significant correlations with academic performance of medical students, while the four subtests that compose Part 2 measure subject proficiency in areas which are part of the academic background required of applicants to the medical course.

The subtests in Part 1 are as follows:

VERBAL. This subtest consists of two item types, namely, word analogies and reading comprehension, which measure verbal reasoning, inferential, and analytical abilities. Items in reading comprehension are based on the content of portions of published materials covering a wide range of topics, e.g., social, scientific, medical, philosophical, literary.

INDUCTIVE REASONING. This subtest consists of number, letter, and figural series and figure grouping items. These items measure induction, a reasoning that occurs in the absence of complete information. Specifically, in the test, it is the ability to perceive relationships among stimuli and draw a logical conclusion or infer a general rule.

QUANTITATIVE. This subtest consists of three item types, namely, fundamental operations (or direct computation), problem solving, and data interpretation. These items are intended to measure general reasoning, or the ability to organize and apply knowledge of basic mathematics and reasoning to find solutions for them.

PERCEPTUAL ACUITY. This subtest consists of three item types, namely, hidden figure, mirror image, and identical information. These are essentially visual recognition tasks that are complicated by distractions. Finding solutions to these items involve accuracy by focusing on relevant details, analyzing relationships, and visualization.

Table 1. Overview of the NMAT

Subtest	Content Area / Item Type	No. of Items	Recommended Time Allotment
Part 1			
Verbal	Analogies Reading Comprehension	40	40 minutes
Inductive Reasoning	Figure Series Figure Grouping Number and Letter Series	40	50 minutes
Quantitative	Fundamental Operation Problem Solving Data Interpretation	40	50 minutes
Perceptual Acuity	Hidden Figure Mirror Image Identical Information	40	40 minutes
<i>Time Limit*</i>			3 hours

Part 2			
Biology	Unity and Diversity of Life Cells and Cellular Processes Genetics The World of Plants and Animals Development Life Processes: Regulation and Homeostasis Organisms and Their Environment	50	35 minutes
Physics	Mechanics Thermodynamics Vibrations, Waves, and Optics Electricity and Magnetism Modern Physics	50	40 minutes
Social Science	Sociology and Anthropology Psychology	50	35 minutes
Chemistry	General Chemistry Analytical Chemistry Organic Chemistry Biochemistry	50	40 minutes
<i>Time Limit*</i>			2 ½ hours

* Time limit starts when the signal to begin the test is given. It does not include time spent on preliminary activities, giving directions, and distribution of materials.

The four subtests that compose Part 2 are **BIOLOGY**, **PHYSICS**, **SOCIAL SCIENCE**, and **CHEMISTRY**. Social Science includes items in psychology, sociology, and anthropology. The items in the four subtests are limited to concepts that are common and basic to the curricula of college introductory courses, particularly the degree programs considered as premedical courses. On the whole, these four subtests

measure complex mental abilities because answering the items requires the use of the different cognitive skills—understanding, applying, analyzing, evaluating, and synthesizing.

Preparing for the Test

You, the prospective test taker, must familiarize yourself with the look and feel of the NMAT in advance. It will minimize your anxiety and help you be better prepared for the actual testing experience.

Understanding the NMAT

Test taking will be greatly improved with the use of a practice set that, more or less, reflects the content and test length of the NMAT and the skills that the test measures. The practice test will help you know what each particular subtest is about, and what it measures by analyzing the information, concepts, and principles involved in the items.

The brief description of the NMAT in the previous section gives you an idea of the relative difficulty of the subtests. Part 1 requires more of innate abilities. The items in any of the four subtests of Part 1 primarily measure aptitude. Basic concepts or principles can be found in the items presented. In Part 2, the items in any of the four subtests, with the exception of some recall items, require the use of complex abilities such as application and analysis. This is where Part 2 will require references and note taking. For example, in the practice test, a problem in physics that requires the use of a formula will need your ability to recall the formula and apply it. It is, therefore, good practice to note down your analysis of the problem. A formula has a number of variables, and it is likely to appear in similar problems involving the other variables.

Management of Study Time

There are about two to four months between the registration for the NMAT and the administration of the test, depending on when you take the test. Apportion your time wisely so that you can cover all the areas included in Part 2. Your practice can be a good indicator of your weak areas. Early in your preparation to take the NMAT, you should try to answer all the questions in your practice set. The practice set has exactly the same directions as the actual test. You should become familiar with the specific directions before you take the test. This will make it possible for you to spend less time reading instructions and more time answering questions on the actual test.

Upon answering the practice set, tick off or note all the items where you have difficulty understanding and getting the correct answers. Then reread your notes or reference books and analyze why your answers differ from the correct answer. Do your review systematically so you proceed by sections. After you have finished reviewing your weak areas, you should now be ready to take the NMAT.

To prepare yourself to take the test under time pressure, take your practice set and simulate the actual test time which is 3 hours for Part 1 and 2 ½ hours for Part 2.

After answering the test under time pressure, score your test against the Answer Key. If you get 75% of the items correctly, you are in good shape and ready to take the NMAT. Lower than 75% correct answers will mean the need to improve your base information level on the various subtests and to sharpen your application and/or analytical skills.

CAUTION: The Practice Set is meant to guide you in your review and to provide you with an opportunity to simulate the NMAT testing procedure. Do not memorize the test questions and the answers in the answer key. The NMAT you will take will not include the same questions you see in the Practice Set.

The CEM is NOT affiliated with, and does NOT endorse enrollment to any professional review school or any medical school in the Philippines. Please immediately inform the CEM management of incidents involving any institution and/or person(s) particularly those previously or currently connected with CEM as officers and employees, as local or foreign field representatives and coordinators for the NMAT and other CEM tests, making pronouncement or claims contrary to the above. You may email the NMAT Secretariat at nmat@cem-inc.org.ph.

Test Scores

Each NMAT form administered measures the same basic skills and concepts but uses different questions. Because of this, there is a potential for a form to be either easier or slightly more difficult than another. Hence, an examinee's raw scores are converted to a scale that takes into consideration the level of difficulty of the test questions on a given form. This conversion makes possible the comparison of reported scores across test forms.

The NMAT yields the following set of scores: (1) Part 1 subtest scores and a composite score called APT, (2) Part 2 subtest scores and a composite score called SA, and (3) a full composite score derived from the eight subtests called the General Performance Score (GPS).

The score on each of the eight subtests is expressed as a standard score (SS). The SS has a range of 200 – 800. The test results of examinees are compared to those of the norm group which has mean scores of 500 and standard deviation of 100.

The NMAT GPS is reported with a corresponding percentile rank (PR) that ranges from 1- to 99+, with a midpoint of 50. The PR indicates the percentage of NMAT examinees who have NMAT scores the same as or lower than the examinee.

The PR will be evaluated by the medical school against the PR cutoff prescribed by the Commission on Higher Education (CHED) or by the school itself. This PR cutoff is the minimum score that qualifies an examinee as a bonafide applicant for admission into his/her preferred medical school.

The scores are official and are guaranteed free of discrepancies. The CEM does not entertain rechecking of NMAT answer sheets.

Your obtained NMAT scores at any given examination year are considered sufficient and valid as basis for evaluating your application for admission to a college of medicine. You are encouraged to do well in the test and obtain your best scores to increase your chances of being accepted in the best medical schools in the Philippines.

Release of Score Reports

The test scores are reported through the Examinee Report (electronic and printed copy) and the Masterlist of Test Results (MTR).

Release of Test Results: Electronic Copy

An electronic copy of your test results is available after **twenty (20) CEM business days** from the test date. You may click on the link for Test Results under the Online Options on the CEM website to check status, view and/or download a copy. The electronic copy is not valid for admission purposes. It is only meant to help you understand your scores so you can decide to which Philippine medical schools to apply and whether or not you will retake the test

PART 4. EXAMINEE AGREEMENT

Before you register for the NMAT, you must have downloaded and read the NMAT Bulletin of Information (BOI). The BOI is the official policy and procedure guide to the NMAT. In addition to adhering to the policies contained in the BOI, when you register for the test you will be asked to accept the NMAT Examinee Agreement. The NMAT Examinee Agreement aims at a thorough understanding of the NMAT testing policies and procedures and of maintaining a fair and secure testing process. It consists of several online screens that reiterate the main provisions of the BOI on the following:

- Eligibility and registration requirements
- Payment and refund
- Test day instructions
- Prohibited items and behavior on test day
- Terms and conditions for taking the NMAT

The last three online screens of the NMAT Examinee Agreement sets forth terms under which you agree to register and take the NMAT, including, but not limited to, a prohibition on discussion or disclosure of test content. If you do not agree to these terms, you will not be permitted to register for the NMAT.

6. In pursuit of test fairness among all examinees, I understand that it is my responsibility as NMAT taker to report all instances of suspected cheating on the part of any examinee.
7. I have read and will comply with the terms set forth in the NMAT BOI, including, but not limited to, the rules and regulations concerning test-day procedures, the ban on bringing review materials or other prohibited information or items into my assigned building and testing room, and other prohibited behavior before, during, or after the test administration.
8. I am aware that the NMAT is confidential and that its contents will be disclosed to me only on the day of the test.
9. I have been informed that the NMAT and the questions therein are copyrighted and are protected by Philippines and international copyright and trade secret laws.
10. I agree that I will not discuss or disclose the NMAT content orally, in writing, on the internet, or through any other medium.

11. I agree that I will not copy, reproduce, adapt, disclose, or transmit test items, in whole or in part, or assist anyone else in doing the same.
12. I further agree that I will not reconstruct test content from memory, by dictation, or by any other means, for the purpose of sharing that information with any other individual or entity.
13. I understand that prohibited acts related to confidentiality include, but are not limited to: describing questions, passages, or graphics from the test; identifying terms or concepts contained in test items; sharing answers to questions; referring others to information I saw on the test; reconstructing a list of topics on the test; and discussing test items, answers, passages, graphics, or topics on social media, or through other means.
14. I understand and agree that any alleged violation of this Examinee Agreement or any alleged activity that may compromise the validity, integrity, or security of the NMAT will be investigated.
15. I also understand and agree that if I provide false information, violate the terms of this Examinee Agreement, any other terms or conditions stated in the NMAT BOI, or any test center rules and regulations, engage in any activity that may compromise the validity, integrity, or security of the NMAT, or fail to fully cooperate in any investigation of a violation of the Examinee Agreement or the terms and conditions of the NMAT BOI, including a post-test identity verification:
 - That the CEM may issue a report of the factual findings of the investigation to legitimately interested parties;
 - That my answer sheet may NOT be processed and NO official test results may be issued; and
 - That I may be banned from taking the NMAT for a specific period of time.
